

ARMADA FOODS ENERGY POLICY

We are committed to continuously improving the Energy Management System and Energy Performance by using energy effectively at all our production stages.

In order to realize this commitment, the following issues have been committed in accordance with the energy use, consumption structure and scale,

-  The availability of information and necessary resources to achieve energy goals and objectives will be ensured.
-  All applicable legal regulations and other conditions related to energy use, efficiency and consumption will be followed and the necessary actions will be taken quickly.
-  In order to create efficiency awareness in our employees, the necessary training and information will be provided losses and leaks will be reduced and energy efficiency will be ensured.
-  The necessary support will be provided for the purchase of energy efficient products and services that may affect energy performance.
-  It will be supported to carry out inplant equipment, system and process.
-  In order to ensure the continuity of the established system, the Energy Policy will be recorded, constantly reviewed and updated as necessary.
